May 3, 2017

Good Spirit Lake Provincial Park
Box 38
Canora, SK
S0A 0L0

Dear Waterworks Owner/Operator:

This letter is to advise you that a Precautionary Drinking Water Advisory (PDWA) will be placed on the Good Spirit Lake Provincial Park Seasonal Distribution system, and is effective immediately, until further notice.

Water Security Agency protocol is to place systems under a PDWA as part of seasonal start-up protocol until such a time as their entire system is proven safe for human consumptive use. This Precautionary Drinking Water Advisory remains in effect until the safety of the Good Spirit Lake Provincial Park Seasonal Distribution system can be ensured at all times. Therefore, I ask that the administration notify all users of the drinking water distribution system of the conditions in the attached Precautionary Drinking Water Advisory.

This advisory can be rescinded following:

1) The distribution system has been pressurized, and flushed, according to applicable standards.
2) Chlorine and turbidity are within regulated values throughout the system.
3) The receipt of two (2) consecutive sets of two (2) bacteriological samples collected one day apart that are negative for bacteriological growth in the final treated potable water, being supplied throughout the section of the pipeline mentioned above.

Thank you for your cooperation in this regard. For further information please do not hesitate to contact the undersigned at (306) 785-1424.

Sincerely,

[Signature]

Precautionary Drinking Water Advisory
Good Spirit Provincial Park

This Advisory applies to all residents and users of the Good Spirit Lake Provincial Park Seasonal Distribution System and is effective: May 3, 2017.

Pursuant to clause 36(1)(a) of The Environmental Management and Protection Act 2010 this Precautionary Drinking Water Advisory is issued due to seasonal start-up protocol and therefore the safety of Good Spirit Lake Provincial Park Seasonal Distribution drinking water supply cannot be ensured at all times. Therefore, pursuant to Clause 36(1)(b) of The Environmental Management and Protection Act 2010, consumers must be notified to:

(a) boil all water, used for drinking purposes, for at least one (1) minute, at a rolling boil, prior to use;
(b) boil water to be used for other activities where it may be ingested, including:
   (i) brushing teeth or soaking false teeth;
   (ii) washing fruits and vegetables;
   (iii) food or drink which will not be subsequently heated; and
   (iv) ice cubes;
(c) not use the water for washing dishes, unless the water has been boiled or the dishes are sanitized in another fashion. Washed dishes and utensils can be soaked in a bleach water solution (approximately 2 tablespoons of bleach per gallon or 10 ml of bleach per liter of water) for at least two minutes after being washed to kill any bacteria which may be present.
   Note: Do not mix bleach with soaps or detergents.
(d) not drink from any public drinking fountains supplied with water from the public water supply;
(e) ensure that younger children and infants are sponge bathed;
(f) use an alternative water source known to be safe, if they do not wish to boil the water; and
(g) consult with your physician if you have cuts or rashes that are severe before using the water.

Under most circumstances, there is no need to boil water used for other household purposes. Adults, adolescents and older children may shower, bathe or wash using tap water but should avoid swallowing the water. Laundry may be washed in tap water, either by hand or by machine.

This Advisory is effective immediately, and will not be lifted until the water supply is determined to be completely safe.
